欢迎致辞

尊敬的贵宾：

中国数谷、避暑之都、爽爽贵阳欢迎您！

8 月 28 日 -30 日，由国家数据局主办、贵州省人民政府承办的全球首个大数据主题博览会——中国国际大数据产业博览会（以下简称“数博会”）将在中国数谷、爽爽贵阳拉开帷幕，掀起大数据产业发展的新浪潮。

自 2015 年举办以来，在以习近平同志为核心的党中央亲切关怀下，在国家有关部委和社会各方的大力支持下，我们始终秉持“全球视野、国家战略、产业视角、企业立场”的办会理念，不断深化内涵、丰富内容、创新形式，经过十年的探索和积淀，已经成为我国数据领域引领创新趋势、展示行业成果、促进开放合作的重要载体。

当前，全球数字经济正迈入以数据要素市场化为核心、以智能化技术为驱动的新阶段。数据作为数字经济的关键要素，已深度融入经济社会各领域，成为重塑产业格局、培育新质生产力的关键引擎。2025 数博会将以“数聚产业动能 智启发展新篇”为主题，全面展现数据要素与人工智能技术融合创新的最新成果，推动数据资源的高效汇聚和开发利用，为产业转型升级和经济高质量发展注入强劲动力。本届数博会将进一步突出“国际化”“专业化”“产业化”，积极推动打造数字经济创新发展解决方案的国内外供需对接平台、数据领域专业性权威性交流平台、各类市场主体技术创新成果价值转化的首选平台。以专业展览为重点，配套举办开幕式、行业交流活动、行业赛事、系列特色活动等，为您呈现一场精彩纷呈的数据产业盛会。

为方便您了解大会日程，我们准备了《会议手册》供您参阅。祝您在本次会议中度过一段美好的时光！

Welcome Message

Dear guests,

Welcome to Cool Guiyang—China's Data Valley and Summer Resort Capital!

China International Big Data Industry Expo 2025 will be held in this city from August 28 to 30. Hosted by the National Data Administration and undertaken by the Guizhou Provincial People's Government, this is the world's first expo dedicated to big data, and is expected to fuel a new wave of development in the industry.

Since the inception of the Expo in 2015, we have received the support of the CPC Central Committee with Comrade Xi Jinping at its core, relevant ministries and commissions, and the general public. Prioritizing "a global vision, national strategies, the industrial perspective, and the stance of enterprises," we have continuously enriched the event by introducing new features and formats. Through ten years of exploration, the Expo has evolved into an important platform in China for spearheading innovations, showcasing industry best practices, and promoting openness and cooperation in the data field.

Currently, the global digital economy is entering a new stage characterized by the development of data markets and driven by intelligent technologies. As a key factor of production in the digital economy, data has been deeply integrated into all areas of economic and social development. It has become a key engine for reshaping the industry's business landscape and cultivating new quality productive forces. This year's Expo, themed "Data Drives Industrial Momentum, Intelligence Unlocks the Future," will comprehensively showcase the latest innovations in the integration of AI technologies and data as a factor of production. It aims to promote the efficient pooling, development and utilization of data resources, while driving industrial transformation and upgrade as well as high-quality economic development. With a stronger focus on "internationalization," "specialization," and "industrialization," the Expo is set to become a platform for matching international and domestic supply and demand for innovative solutions in the digital economy, an authoritative and specialized exchange platform in the data field, and the platform of choice for market entities to commercialize technological innovations. In addition to specialized exhibitions, this year's Expo will include an opening ceremony, industry exchanges and competitions, and a series of special events, presenting a splendid data industry gala.

This Conference Handbook contains the schedule and other useful information about the event. We hope that you'll find it helpful, and wish you a great stay in Guiyang.

The First China Credit and Digital Economy Exchange Activity: Empowering Credit Innovation through Digital Intelligence

Theme	Empowering Credit Innovation through Digital Intelligence
Hosted by	Guizhou Provincial Information Center
Supported by	Guiyang Branch, Shanghai Pudong Development Bank
Location	Guizhou Hall, Guizhou International Conference Center
Time	14:30-16:40 on August 27, 2025
Activity Overview	As the digital economy advances rapidly, emerging technologies such as artificial intelligence and big data are becoming deeply embedded in the credit industry, driving the transformation of credit assessment models toward greater precision and intelligence, and giving rise to innovative applications such as "Credit + AI" and "Credit + Big Data." Against this backdrop, seizing the development opportunities brought by data elements and accelerating digital technology innovation will significantly expand the coverage and accuracy of the credit system, while more effectively safeguarding social fairness and justice. To further deepen industry-wide exchange, the activity on "Empowering Credit Innovation through Digital Intelligence" aims to establish a collaborative platform involving government, industry, academia, research institutions, and application sectors. Discussions will focus on the digital transformation of the credit and credit reporting sector, best practices and explorations in credit data governance, and the optimization of credit evaluation through AI. Ultimately, the event seeks to contribute to the development of a modern credit service system that is open in architecture, secure in governance, and efficient in operation, providing strong support for broader economic and social progress.
Structure of the Event	Guest speeches; keynote speeches; exchanges and dialogues

Exchange Activity on "AI Trusted Data Space"

Theme	Data Drives Industrial Momentum, Intelligence Unlocks the Future
Hosted by	Department of Resource Coordination, National Data Administration; Guizhou Provincial Bureau of Big Data Development and Management
Undertaken by	Huawei Technologies Co., Ltd.
Location	Ballroom B, 1F, Guiyang International Eco-Conference Center
Time	14:00-16:00 on August 28, 2025
Activity Overview	In this new era of deep integration between artificial intelligence and data elements, data has become a core engine of innovation. To address pressing challenges related to data security, privacy, and trust—and to foster the healthy and sustainable growth of the AI industry—the "Trusted Data Space Summit" is set to take place under the framework of the 2025 Big Data Expo. The summit will gather academicians, industry leaders, policymakers, and pioneering technologists to delve into core issues such as data space architecture, privacy-preserving computation, and data ownership and governance. It aims to overcome the persistent issue of "data silos" and, while upholding data sovereignty and security, explore innovative pathways for secure, controllable, efficient, and compliant data circulation and collaboration across cities, industries, and sectors. By doing so, it seeks to provide a reliable and trustworthy data foundation for the training, optimization, and deployment of AI models. The summit will also unveil collaborative achievements—including a white paper on Trusted Data Spaces—and share benchmark enterprises' leading practices in unlocking the value of data elements.
Structure of the Event	Guest speeches; keynote speeches; achievements release; experience sharing

Exchange Activity on "High-Quality Dataset Development"

Theme	Empowering the Innovative Development of Artificial Intelligence with Data Elements
Hosted by	National Data Administration
Undertaken by	China Academy of Information and Communications Technology, China Mobile Communications Group Co., Ltd.
Location	Multi-Function Convention Hall C, 3F, Guiyang International Eco-Conference Center
Time	14:00-16:00 on August 28, 2025
Activity Overview	As the national "AI+" initiative continues to deepen, high-quality datasets have become a vital foundation for training efficient and intelligent AI models. Across regions and industries, there has been active exploration into the development, operation, application, and ecosystem cultivation of such datasets, giving rise to a range of distinctive and demonstrably effective practices. This thematic exchange activity aims to summarize successful methodologies in high-quality dataset development, leverage China's vast data resources and rich application scenarios, and promote a steady and high-quality data supply. The goal is to advance the reform of market-based allocation of data elements and ensure that such reforms resonate in synergy with the "AI+" initiative.

Exchange Activity on "Data Standardization"

Theme	Standards as the Foundation, Data for a Shared Future
Hosted by	National Data Administration
Undertaken by	China Electronics Standardization Institute, Guizhou Provincial Bureau of Big Data Development and Management, National Institute of Data Development
Supported by	Huawei Technologies Co., Ltd., CETC Big Data Research Institute Co., Ltd., Southern Power Grid Data Platform & Security Co., Ltd., National Technology Standards Innovation Base (Guizhou Big Data)
Location	Multi-Function Convention Hall C, 3F, Guiyang International Eco-Conference Center
Time	08:30-10:30 on August 29, 2025
Activity Overview	Hosted by the National Data Administration and organized by the China Electronics Standardization Institute and the Guizhou Provincial Bureau of Big Data Development and Management, this activity will bring together representatives from relevant national ministries and commissions, local data management departments, related enterprises and institutions, representatives of international standardization organizations/associations, members of the National Technical Committee 609 on Data of Standardization Administration of China, as well as heads, deputy heads of the Committee's relevant working groups, and representatives of its member organizations. The event will focus on comprehensively advancing both domestic and international data standardization efforts. Discussions will center on key areas such as data infrastructure, trusted data space, the national integrated computing power network, high-quality datasets, data services, and anonymized data circulation, exploring topics related to industrial development, technological innovation, and practical implementation in these domains.
Structure of the Event	Speeches; keynote reports; achievements release

Exchange Activity on "Electricity + Computing Synergy · Trusted Interconnection: A New Paradigm for Coordinated Electric Power and Energy Data Elements Flow"

Theme	Electricity + Computing Synergy · Trusted Interconnection
Hosted by	China Southern Power Grid, Trusted Data Space Development Alliance
Supported by	Guizhou Power Grid Co., Ltd., China Southern Power Grid Digital Grid Group Co., Ltd., China Southern Power Grid Digital Media Technology Co., Ltd.
Location	Multi-Function Convention Hall A and B, 3F, Guiyang International Eco-Conference Center
Time	09:00-12:00 on August 29, 2025
Activity Overview	China Southern Power Grid actively responds to the national strategy for building an integrated computing network and the reform agenda for marketizing data elements. Leveraging its unique strengths in power systems, computing infrastructure, and energy data, the company will host a themed exchange event: "Electricity + Computing Synergy · Trusted Interconnection: A New Paradigm for Coordinated Electric Power and Energy Data Elements Flow." The event will feature keynote speeches by academicians, achievement announcements, signing ceremonies, and ecosystem partner sharing. It aims to bring together stakeholders across the industry to explore the deep integration of electricity, computing, and carbon management (Electricity–Computing–Carbon synergy), and to promote innovative applications of trusted data spaces within the energy sector. The event seeks to advance the collaborative development of a unified national computing network, unlock the latent value of energy-related data elements, and contribute to the high-quality growth of the digital economy.
Structure of the Event	Guest speeches; keynote speeches; achievements release and sharing

Exchange Activity on "Public Data Development and Utilization"

Theme	Systematic Development and Utilization of Public Data
Hosted by	The Executive Committee of the China International Big Data Industry Expo
Undertaken by	Guizhou Big Data Group, National Engineering Research Center for Big Data Applications in Government Governance, CETC Big Data Research Institute Co., Ltd.
Location	International Conference Hall, 3F, Guiyang International Eco-Conference Center
Time	09:00-12:00 on August 29, 2025
Activity Overview	The Exchange Activity on Public Data Development and Utilization, a side event of the China International Big Data Industry Expo 2025, will be held on the morning of August 29, 2025, at the Guiyang International Eco-Conference Center in Guizhou Province. The event is hosted by the Executive Committee of the China International Big Data Industry Expo, and jointly organized by Guizhou Big Data Group, National Engineering Research Center for Big Data Applications in Government Governance, and CETC Big Data Research Institute Co., Ltd. Under the theme of "Systematic Development and Utilization of Public Data," the event will invite representatives from government, industry, academia, research institutions, and media. It will focus on key elements of a fully coordinated public data value chain, and facilitate in-depth discussions. By sharing practical cases of institutional innovation and technological integration, the activity aims to explore viable paths for enabling public data to be well supplied, efficiently circulated, effectively utilized, and securely protected—ultimately providing valuable references for policy-making and optimization in public data development and utilization.
Structure of the Event	Opening speeches; keynote speeches; roundtable discussions

Exchange Activity on "Aggregating Computing Power, Enabling an Intelligent Future"

Theme	Aggregating Computing Power, Enabling an Intelligent Future
Undertaken by	State Information Center, Guizhou Provincial Bureau of Big Data Development and Management, The Administrative Committee of Gui'an New Area, China Development and Reform News
Location	Ballroom A, 1F, Guiyang International Eco-Conference Center
Time	09:00-12:00 on August 29, 2025
Activity Overview	As a new quality productive force in the digital economy era, computing power has become both a critical infrastructure under unified national planning and a core driver of digital economic development. In recent years, it has received high-level attention from the CPC Central Committee and the State Council. Against this backdrop, the National Integrated Computing Power Network—an essential vehicle for promoting coordinated development and efficient utilization of computing power—is accelerating its construction. How to effectively advance infrastructure deployment, optimize resource allocation, and unlock industrial value has become a global focal point for exploration and practice. These efforts aim to foster collaboration between eastern and western regions and empower diverse industries through AI. During the 2025 Big Data Expo, the Exchange Activity on "Aggregating Computing Power, Enabling an Intelligent Future" will take a deep dive into these themes. The event will bring together global experts, scholars, and industry representatives from the digital economy domain to engage in in-depth discussions on cutting-edge computing technologies, real-world applications, AI empowerment, and green low-carbon development. We hope this activity will serve as a platform for collective intelligence and consensus-building, exploring innovative pathways for computing power to empower a wide range of industries. Ultimately, the goal is to fully unleash the value of computing infrastructure and inject strong momentum into the development of computing power infrastructure and the broader Digital China initiative—positioning China to seize strategic advantages in the global computing power race.

Exchange Activity on "Innovative Development of the Data Industry"

Theme	Integration of Data and Intelligence, Shared Value Creation
Hosted by	National Data Administration
Undertaken by	National Institute of Data Development, China Mobile Communications Group Co., Ltd., Taiji Computer Co., Ltd.
Location	Ballroom C, 1F, Guiyang International Eco-Conference Center
Time	14:40-17:40 on August 28, 2025
Activity Overview	With the theme of "Integration of Data and Intelligence, Shared Value Creation," this exchange activity will bring together representatives from academia, government agencies, central state-owned enterprises, and leading platform-based innovators in the data industry. The event aims to identify emerging trends in data, ignite innovation momentum, and collaboratively explore new paradigms for the development of the data industry.
Structure of the Event	Guest speeches; keynote speeches; achievements release; exchanges and dialogues

Exchange Activity on "Data Transaction Ecology Meeting"

Theme	Data-Driven Ecological Synergy: Unleashing a New Chapter of Value through Intelligence
Guided by	The Executive Committee of the China International Big Data Industry Expo
Undertaken by	Beijing International Big Data Exchange, Shenzhen Data Exchange, Guiyang Big Data Exchange
Responsible Units	Industrial Development Bureau, Guiyang National High-Tech Industrial Development Zone Administrative Committee
Location	International Conference Hall, 3F, Guiyang International Eco-Conference Center
Time	14:30-17:40 on August 29, 2025
Activity Overview	During the 2025 Big Data Expo, the Beijing International Big Data Exchange, Shenzhen Data Exchange, and Guiyang Big Data Exchange will jointly host the "Data Transaction Ecology Meeting." The event will gather experts in digital economy, data elements, and artificial intelligence to explore new trends, opportunities, and challenges in data application scenarios. Aligned with the key priorities of the National Data Administration, the forum will examine how data transactions can empower both the digital and real economies, and share innovative practices and success stories. The conference will open with a presentation of collaborative outcomes, pool collective industry wisdom, and define a new strategic trajectory for the development of data elements. It aims to contribute to the healthy growth of the global data transaction market, amplify the scaling, compounding, and multiplier effects of data elements, and usher in the next golden decade of data transaction ecosystem development—fueling high-quality growth of the digital economy.
Structure of the Event	Guest speeches; keynote speeches; exchanges and dialogues

Exchange Activity on "AI Industry Innovation and Development"

Theme	Building the Foundation of Intelligent Computing · Accelerating Industrial Transformation
Hosted by	Gui'an Development Group Co., Ltd., H3C
Supported by	Guizhou Gui'an Industrial Investment Co., Ltd., Gui'an New Area Digital Technology Co., Ltd., Guizhou Unisound Cloud Data Technology Co., Ltd.
Location	Guiyang Hall, 3F, Renaissance Guiyang Hotel
Time	14:00-17:00 on August 28, 2025
Activity Overview	As the AI industry continues its rapid growth, Guizhou—positioned as a key hub in the national "Eastern Data, Western Computing" strategy—is proactively advancing the development and upgrading of its intelligent computing industry. In 2024, H3C and Gui'an Development Group Co., Ltd. jointly developed Turing Town in Guiyang-Gui'an, aiming to accelerate inclusive and widespread adoption of AI technologies across various industries through innovative industrial models. After a year of development, the latest achievements of Turing Town will be showcased at the 2025 Big Data Expo during the AI Industry Innovation & Development Summit titled "Building the Foundation of Intelligent Computing · Accelerating Industrial Transformation." The event will bring together experts and leaders from multiple sectors to share insights into cutting-edge AI technologies, industry trends, and innovation models. It will unite forces across the ecosystem to drive intelligent transformation across a wide range of industries.
Structure of the Event	Guest speeches; keynote speeches; product releases; signing ceremonies

Exchange Activity on "Government-Enterprise Cooperation to Build a New AI-Driven Industrial Development Pattern" (Seminar)

Theme	Building an Intelligent Chain · Empowering a New Landscape
Guided by	The Executive Committee of the China International Big Data Industry Expo
Undertaken by	Center for Future Government Studies, School of Public Policy and Management, Tsinghua University; CNKI Digital Technology Co., Ltd.; Huawei Cloud.
Supported by	Guizhou CNKI Digital Technology Co., Ltd.
Responsible Unit	Guiyang Public Resources Trading Center
Location	Meeting Room 3001, 3F, Novotel Guiyang Panjiang Hotel
Time	14:00-17:30 on August 28, 2025
Activity Overview	This seminar is jointly organized by the Center for Future Government Studies, School of Public Policy and Management, Tsinghua University; CNKI Digital Technology Co., Ltd., and Huawei Cloud, with support from the Digitalization and AI Sub-Committee of the Chinese Nuclear Society and Guizhou CNKI Technology Development Co., Ltd. Under the theme "Building an Intelligent Chain · Empowering a New Landscape," the seminar will bring together experts and scholars from academia, government, and industry to explore a new AI-driven model for industrial development. It aims to promote the deep integration of digital and industrial innovation, facilitate industrial intelligent upgrades, foster new quality productive forces, and co-create fresh momentum for AI-powered development.
Structure of the Event	Guest speeches; keynote speeches; exchanges and dialogues

Exchange Activity on "Digital Rule of Law"

Theme	New Drivers for Digital Rule of Law: Theoretical Innovation and Technological Transformation
Hosted by	Digital Rule of Law Laboratory, Zhejiang University; Bestone Information Technology Co., Ltd.
Undertaken by	Law School of Guizhou University, Beijing Beida Yinghua Technology Co., Ltd.
Supported by	China Computer Federation (CCF)
Location	Duocai Hall, 3F, Grand Guizhou Park Hotel
Time	14:00-18:30 on August 29, 2025
Activity Overview	The "Digital Rule of Law" Exchange Activity at the China International Big Data Industry Expo 2025 is co-hosted by the Digital Rule of Law Laboratory of Zhejiang University and Bestone Information Technology Co., Ltd., and undertaken by Beijing Beida Yinghua Technology Co., Ltd. and the Law School of Guizhou University. The event is also supported by Beijing Andu Intelligent Technology Co., Ltd., Chengdu UA Network Technology Co., Ltd., Guangdong Bowei Chuanyuan Technology Co., Ltd., and Haifeng Kunxing (Shenzhen) Network Technology Co., Ltd. Under the theme of "New Drivers for Digital Rule of Law: Theoretical Innovation and Technological Transformation," the event echoes the Expo's core theme, "Data Drives Industrial Momentum, Intelligence Unlocks the Future," and focuses on the integration of data factor marketization and AI innovation. Anchored in critical challenges of legal technology—such as ethical controversies in AI-enabled judicial applications and the intelligent transformation of legal services—the activity aims to explore both the theoretical and practical dimensions of building a digital rule of law framework. It also emphasizes the practical application of innovations from young legal-tech professionals, fostering consensus on industry-academia-research collaborative development.

Co-organized by	Zhonggao Co., Ltd.
Location	Multi-Function Convention Hall C, 3F, Guiyang International Eco-Conference Center
Time	14:00-18:00 on August 29, 2025
Activity Overview	The report to the 20th National Congress of the Communist Party of China emphasized the need to "accelerate the development of the digital economy and promote its deep integration with the real economy." The integration of new-generation information technologies with various industries is giving rise to a new form of digital productivity and driving the growth of the digital economy—an essential pathway

for developing a modern economic system in the new era. Emerging digital technologies such as big data, cloud computing, and artificial intelligence represent some of the most dynamic, widely applied, and influential fields of innovation today, exerting profound impacts on industrial development, daily life, and social governance.

With the rapid advancement of 5G communications, artificial intelligence, virtual reality, and large language models, the refinement and intelligence of digital humans continue to improve. The big data industry is being increasingly embedded into a wide range of professional roles and everyday life scenarios, injecting new momentum into the growth of the digital economy. This exchange activity will be grounded in China's "Valley of Intelligence" while embracing a global perspective, focusing on opportunities and challenges for the high-quality development of China's big data industry.

The event will gather experts from relevant government bodies, leading enterprises, and academic institutions. It will also bring together companies from across the industry chain—including those involved in research, technology, content, IP development, operations, applications, and investment—making it a landmark event in the Belt and Road Big Data sector. By fostering innovation and collaborative synergy among elites from various sectors, the activity aims to make a greater contribution to guiding the development of the new era.

Exchange Activity on "Data Labeling and High-Quality Dataset Construction in the Financial Sector"

Theme	Empowering the Future with Data and Intelligence
Guided by	The Executive Committee of the China International Big Data Industry Expo, Guizhou Provincial Bureau of Big Data Development and Management
Undertaken by	China Industrial Control Systems Cyber Emergency Response Team (CICS-CERT), Inspur Software Group Co., Ltd., Shanghai KUPAS Technology Co., Ltd., Shanghai Hanwei Information Technology Co., Ltd.
Location	Salon 1 Meeting Room, Hyatt Regency Guiyang
Time	14:00-17:30 on August 29, 2025
Activity Overview	High-quality datasets are foundational infrastructure for the digital transformation of financial institutions. They play a vital role in enhancing decision-making accuracy, preventing systemic risks, and driving business innovation. However, current challenges such as inconsistent standards, uneven data quality, and difficulties in data sharing continue to constrain the effectiveness of key financial scenarios including risk control and marketing. Against the backdrop of the China International Big Data Industry Expo 2025, this thematic session on "Data Labeling and High-Quality Dataset Construction in the Financial Sector" is convened to address these issues. The session will focus on the current state of high-quality dataset development in the financial sector, exploring construction pathways, technical challenges, and collaborative mechanisms across the industry. The goal is to unlock the value of financial data and promote high-quality development across the sector.
Structure of the Event	Guest speeches; keynote speeches; exchanges and dialogues

Exchange Activity on "Boundless Intelligence: Open Innovation Driving Industrial Transformation"

Theme	Boundless Intelligence: Open Innovation Driving Industrial Transformation
Guided by	Guizhou Provincial Department of Science and Technology
Hosted by	Administrative Committee, Guiyang Big Data Sci-Tech Innovation City (Su-Guizhou Industrial Park / Zhangjiang (Gui'an) Hi-Tech Industrial Park), Plug and Play China
Undertaken by	Guizhou Big Data Industrial Development Co., Ltd. (Big Science City)
Location	Meeting Room 4, 2F, Guiyang International Eco-Conference Center
Time	09:00-12:00 on August 29, 2025
Activity Overview	Focusing on the core industries of Gui'an New Area—namely new energy batteries and materials, advanced equipment manufacturing, and big data electronic information—this event will center around key frontier domains such as the digital economy, artificial intelligence, intelligent computing, and new energy. It aims to attract domestic and international tech innovation entities to Big Science City by aligning real-world application scenarios from local industrial chain-leading enterprises with the innovation demands of industry leaders. The activity also promotes multi-directional linkages: • **With universities and research institutions,** to accelerate the transformation of scientific and technological achievements; • **With multi-level capital systems,** to boost investment acceleration and financial empowerment for high-quality projects; • **With domestic and international innovation ecosystems,** to foster synergy between Guiyang Big Data Sci-Tech Innovation City, Gui'an New Area, and Guiyang City in terms of global-local collaboration, scenario-technology integration, and infrastructure-resource coordination.

About Guizhou

Guizhou is located in the hinterland of southwestern China. It was officially established as a province with the creation of Guizhou Provincial Administration Commission in 1413. The province covers an area of 176,200 square kilometers and administers six prefecture-level cities, three autonomous prefectures, and one national-level new district. It is divided into 88 counties (county-level cities, districts, and special districts), with a resident population of 38.6 million and a registered population of 46.649 million as of the end of 2024, including 18.974 million people from ethnic minorities, accounting for 40.7% of the province's population.

In addition to its long history, Guizhou boasts great cultural diversity, rich resources, a good ecological environment, and a prime location. First, the landscape is beautiful. Guizhou is reputed as the "Province of Parks." It claims four world natural heritage sites: Libo Maolan Karst, Tongren Fanjing Mountain, Chishui Danxia and Shibing Yuntai Mountain, and Zunyi Hailongtun World Cultural Heritage Site. It also has the largest waterfall in Asia, Huangguoshu Waterfall. The climate is comfortable and pleasant, with an average annual temperature of about 15 °C, and the air was good or very good in 99.1% of the days in 2024. Second, the culture is rich and colorful. Guizhou has long been inhabited by 17 ethnic minorities, including Miao, Bouyei, and Dong. The Grand Song of the Dong Ethnic Group, the Feige Tune (Flying Song) of the Miao Ethnic Group, and the Eight-Tone Sitting Singing Performance of the Bouyei People are well-known in the world. During the Long March, the Red Army spent the longest time and had its most extensive presence in Guizhou. In particular, the Zunyi Conference marked a great turning point in the Chinese Revolution. Guizhou also stands out with the philosophy of Wang Yangming, a neo-Confucian thinker of the Ming Dynasty, the culture of Yelang (the first state in Southwest China established by the ancestors of ethnic groups), and the Tunpu culture. Third, Guizhou is rich in natural resources. It ranks among the top ten in the country in terms of the reserve of 64 kinds of mineral resources, and among the top three in terms of the reserve of manganese, phosphorus, and aluminum, and the fifth in the coal reserve, winning it the nickname

of "Coal Sea in the South of the Yangtze River." The forest coverage rate is 63%. It is one of the main producers of medicinal materials in China. Fourth, Guizhou has established industries with distinctive characteristics. It is the first national big data comprehensive pilot zone and one of the areas with the largest number of ultra-large data centers in the world. It is home to the world's largest single-aperture spherical radio telescope-China Sky Eye and is accelerating to develop industry clusters of deep processing of resources, new-energy battery materials, modern energy, sauce-flavored liquor, big data and electronic information, and advanced equipment manufacturing. Fifth, Guizhou enjoys a superior location. It is a land transportation hub in Southwest China and a node on the New International Land-Sea Trade Corridor. All nine cities and autonomous prefectures each have an airport, and eight of them are connected to the high-speed railway. The highway mileage has exceeded 9,000 kilometers, ranking fifth in the country.

In 2024, under the strong leadership of the CPC Central Committee with Comrade Xi Jinping at its core, Guizhou has thoroughly studied and implemented the guiding principles from the 20th CPC National Congress and the second and third plenary sessions of the 20th CPC Central Committee, earnestly acted on Xi's important speeches and directives concerning Guizhou's work, and adhered to the overarching principle of pursuing high-quality development. By leveraging reform as a driving force to promote stable growth, structural adjustment, and risk prevention, Guizhou made significant progress in high-quality development, with its economy having a strong start at the beginning of the year, then slowing down before rebounding toward the year-end, marking solid strides in contributing to Chinese modernization. In 2024, the province's GDP was 2,266.712 billion yuan, an increase of 5.3%, 0.3 percentage points higher than the national average, ranking 15th in terms of growth; the added value of industrial enterprises above designated size increased by 8.2% year-on-year; the import and export totaled 86.238 billion yuan, up by 13.5% year-on-year; fixed-asset investment reached 581.468 billion yuan, up 0.6% year-on-year; general public budget revenue totaled 216.962 billion yuan, a 4.4% increase; total retail sales of consumer goods amounted to 934.238 billion yuan, rising by 3.7%; per capita disposable income of urban residents stood at 44,558 yuan, growing by 4.2%, while that of rural residents reached 15,856 yuan, up 7%. The province saw effectively higher-quality economic growth and an appropriate increase in economic output.

About Guiyang

Guiyang, also known as "Zhu" for short, is the capital of Guizhou Province. Covering an area of 8,043.45 square kilometers, Guiyang governs six districts, one county-level city, and three counties. It is home to one national high-tech industrial development zone, one economic and technological development zone, two free trade zones, and one airport economic zone, and has achieved integrated development with the adjacent Guian New Area, a national-level new area. Guiyang has a permanent population of 6,602,500 (an increase of 199,600 from the previous year) and an urbanization rate of over 80%.

Guiyang is endowed with favorable ecological conditions. Located at 26 degrees north latitude and an average elevation of 1,100 meters, Guiyang has an average temperature of 14.7°C throughout the year, and 22.3 °C in summer, relative humidity ranging from 76% to 79%, over 10,000 negative oxygen ions per cubic centimeter, and an average wind velocity of less than 3 m/s. In addition, the city is embraced by two forest belts that stretch 374 kilometers and cover an area of about 146,666 hectares, with a forest coverage rate of 55.3% and on 99.5% of the days, the air quality is moderate or good. Thanks to such a fantastic, cool environment, the city is voted as a national demonstration zone for ecological conservation, one of the first national forest cities, and dubbed "Cool Guiyang: A City for Summer Resort in China."

Guiyang abounds in natural resources. So far, Guiyang has more than 50 proven mineral resources such as aluminum, phosphorus, and coal. Among them, there are 556 million tonnes of bauxite reserves, 48.1% of the provincial total, the most in Guizhou; 1.477 billion tonnes of phosphorite reserves, 29.6% of the provincial total, the third most in the province. There are 39 proven geothermal sites across the city, and 12 have been developed for commercial use. Moreover, the city grows 1,993 varieties of traditional Chinese medicinal materials, winning the title of "Natural Medicine Valley."

Guiyang has gone viral for its culture and tourism. It boasts 6,520 scenic spots and 1,025 parks of all sorts, including one AAAAA tourist attraction and 24 AAAA ones. While continuing to provide a great experience for tourists in terms of health, culture, sightseeing, food, shopping and travel, Guiyang has deepened the integration of culture, commerce, education, sports, and tourism. New hotspots such as roadside concerts, Yuejie Cinema, Gui'an Cherry Blossom Park, and Qingyun Fun have emerged. Guizhou was rated among China's Top Ten Cities of Great Beauty and China's Top Ten Must-Visit Tourist Cities. In 2024, the city welcomed nearly 170 million tourists, marking a 15.1% increase over the previous year.

Guiyang has a convenient transport network. It has four urban rail transit lines in operation, with an operating mileage of 146 kilometers. It is connected by expressways to all the other cities and counties in the province, and other major cities in China by high-speed railways. It is one of the top ten high-speed rail hub cities in the country, accessible to other major Chinese cities within two to eight hours by high-speed train. Guiyang Longdongbao International Airport has opened 203 routes, with a passenger throughput of nearly 22.313 million in 2024.

Guiyang is open and inclusive. It is an important node of the New International Land-Sea Trade Corridor and a national logistics hub city. It has "1+5" national open platforms and has hosted the China International Big Data Industry Expo, Eco Forum Global Guiyang, and other international events for years in a row. It has established trade contacts with 180 countries and regions, with the China-Europe Express trains, the Guizhou-Guangdong trains, and the New International Land-Sea Trade Corridor trains running regularly.

Guiyang is innovative and vibrant. It is the core area of the National Big Data (Guizhou) Comprehensive Pilot Zone. Huawei Cloud, China Telecom, and Tencent have started to build their intelligent computing centers here. With a computing power scale exceeding 86 EFLOPS, of which intelligent computing accounts for over 98%,

the city has become one of China's leading hubs for AI computing resources and capabilities. Additionally, the National Big Data (Guizhou) Comprehensive Pilot Zone AI Training Ground has been established here. Guiyang has emerged as one of the most innovative cities in western China.

Guiyang shows a strong momentum of development. In 2024, Guiyang's regional GDP reached 577.741 billion yuan, marking a 6% growth—one of the highest growth rates among China's provincial capitals. The added value of industrial enterprises above designated scale increased by 9.7%, while fixed-asset investment grew by 3.6%. The total retail sales of consumer goods hit 258.858 billion yuan, up 2.4%, and per capita GDP stood at 89,000 yuan. Leading enterprises such as Huawei, BYD, CATL, Geely, and Chery have expanded their investments and operations in the city. Currently, Guiyang is leveraging its comparative advantages and making every effort to build a new energy power battery and material R&D and production base, a computing power guarantee base serving customers nationwide, an intensive processing base for important resources, and an industrial backup base.

BIG DATA EXPO 2025

Captain George Coffee Rostery

At Captain George Coffee Rostery, we pour our heart into the art of specialty coffee roasting. We combine deep expertise with a love for the craft, dedicating ourselves to creating unique flavor experiences that capture both the character of coffee terroir and the warmth of culture that surrounds it.

Our mature supply chain allows us to meticulously source high-quality green coffee beans from core coffee-growing regions around the world. We partner with large-scale specialty coffee roasteries in Asia, where state-of-the-art equipment and expert craftsmanship ensure every step of the roasting process meets our exacting standards.

Led by our founder, Peng Jinyang, our accomplished team has a proven record of success in prestigious competitions like the World Brewers Cup. We bring this championship-level expertise to every cup of coffee we craft. From specialty beans for your daily enjoyment to limited-edition series inspired by award-winning brews, we tell the story of coffee through flavor, thoughtfully created to delight a diverse range of palates.

We are thrilled to be a part of the Big Data Expo and look forward to exploring the digital future of coffee with you. With every cup (of coffee) served by Captain George Coffee Rostery, we hope to create a bridge between flavor and passion and offer a window into the incredible world of coffee.

Tea Breaks

We will be offering complimentary Guizhou-style tea breaks to guests throughout the Big Data Expo.

Robot Barista

Experience the future of coffee with our intelligent, bean-to-cup robotic barista. Powered by the sixth-generation COFE+ system from Shanghai Hi-Dolphin Robot Technology Co., Ltd., this robot barista can perform a lot of tasks, including crafting beautiful latte art, producing 3D-printed designs, and creating custom flavors.

Robot-Themed Selfie Spot

Throughout the Big Data Expo, guests can stop by the robot-themed selfie spot at the conference center to interact and snap photos with intelligent machines such as humanoid robots and robotic dogs.

Medical Service

Medical service points will be set up at the following key venues and hotels:
Guiyang International Eco-Conference Center
Guiyang International Conference & Exhibition Center
Hyatt Regency Hotel
Renaissance Hotel
Hilton Guiyang
Guiyang Century Hotel
